

The **Worldwide Practice Enterprise Network** supports schools, VET centers, universities and other educational institutions in network member countries to deliver innovative work-based business and entrepreneurship skills training through our unique Practice Enterprise ‘**learning-by-doing**’ methodology.

What is a Practice Enterprise?

- trainee-run enterprise that operates like a real business
- set up as an office and structured in departments
- engages in commercial activities with other Practice Enterprises from their country and around the world
- various study programmes inside educational curriculae

How can I get involved in Practice Enterprise Events?

There are a number of collaboration opportunities that can be agreed upon by the stakeholder company and the Practice Enterprise, according to staff, timelines and any other requirements. At trade fairs, there is the opportunity to promote real-world products and services within the PE environment and support in the stand design. At competitions such as Elevator Pitches or Social Media Challenges, the event organizers are always looking for judges. If you have a Corporate Social Responsibility (CSR) programme and have specific needs, please contact us for further information.
